December 10, 1976

Dr. Joshua Lederberg
Genetics Department
Stanford University School of Medicine
Stanford, California 94305

Dear Josh,

Enclosed you'll find a copy of Ed's bibliography which was just put together by our archivist. It is believed to be complete.

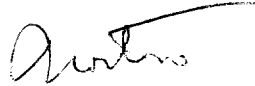

I've listed below the names of Ed's students here at Rockefeller, the titles of their theses and their current positions. I'm still trying to obtain some information about Viola and the National Foundation, etc.

1. 1961. Aaron J. Shatkin. The relationship of myo-inositol to morphology in N. crassa.
Member, Dept. of Cell Biology, Roche Institute of Molecular Biology, Nutley, New Jersey.
2. 1962. Edward Reich. Some aspects of nucleic acid function studied with actinomycin and mitomycin.
Professor, The Rockefeller University, New York, N.Y. 10021.
3. 1963. Carolyn Walch Slayman. Potassium transport in Neurospora Crassa.
Associate Professor, Dept. of Physiology and Human Genetics, Yale University School of Medicine, New Haven, Conn. 06510.
4. 1963. Clifford Slayman (H.K. Hartline co-advisor)
Associate Professor, Dept. of Physiology, Yale University School of Medicine, New Haven, Conn. 06510.
5. 1964. James W. Fristrom. Developmental and biochemical studies on the morphological mutant cryptocephal of D. Melanogaster.
Professor, Division of Animal Genetics, C.S.I.R.O., P.O. Box 90, Epping, N.S.W. Australia.

6. 1965. Bernard F. Mach. The biosynthesis of the anti-biotic tyrocidine as distinguished from protein synthesis. Charge de Recherche, Dept. of Pathology, University of Geneva, Geneva, Switzerland.
7. 1973. James B. Rard. The regulation of sugar transport and galactose metabolism in N. crassa. Research Fellow, California Institute of Technology, Division of Biology, Pasadena, California 91106.

With all best wishes for the New Year *and best regards*

Sincerely,

Norton D. Zinder
